

SafeStep Anti-Slip

SafeStep 100 Anti-Slip

A single component epoxy ester anti-slip floor and outside surface coating designed for areas of heavy pedestrian traffic.

This durable safety coating offers optimum adhesion to concrete, metal and wooden surfaces.

Ideal for applications such as pedestrian ramps, changing room floors, wet processing plants, stairways and walkways.

SafeStep 1550 Anti-Slip

A high solids, heavy duty, anti-slip coating for application in slippery areas making them safer for both pedestrian and rolling equipment traffic.

It provides a tough non-porous surface that is both chemical and corrosion resistant.

Available in 11 different colours, to match either your colour scheme or mark out designated areas.

Tested to AS4586-1999 for friction coefficient.

SafeStep Anti-Slip

INCREASED SAFETY IN AREAS OF: Domestic, Recreation, Schools, Parks, Building & Construction, Industrial, Marine, Farming & Agriculture, Automotive, Rail.
