

# Anti-Slip Solutions NZ Ltd

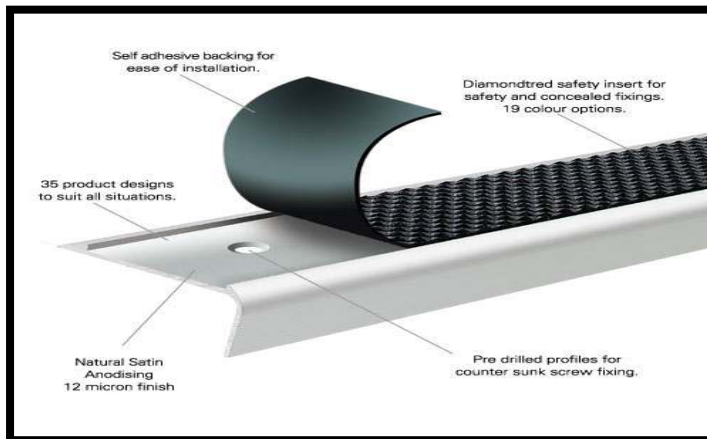

"Keeping New Zealand On Its Feet"

**MADE IN  
NEW ZEALAND**

# TredSafe

TredSafe is available with many different profiles to offer protection not only from slippery step edges, but also to protect carpet edges.

The easy, quick and clean installation, that is ensured by our trained operators, means your steps will remain fully functional during the fitting of your TredSafe nosing.

These TredSafe nosings were fitted with Safety Red inserts to offer excellent step edge definition as well as sure footed grip on slippery step edges.

The profiles will also protect the edges of wooden or concrete steps from wear due to knocks and bangs caused by moving equipment.

Illuminated LED profiles are also available in different colours for cinemas, theatres or other dimly lit steps. It may be that you just want to "Jazz Up" those night club or bar steps !
